

Tyson Fresh Meats, Inc.

Attachment- Product Code/ Label Description for Tested Product Codes

* The label description identified below shows the placement of the 'T' identifier within Tyson Fresh Meats product codes that identifies products that are subject to testing as described by the Beef HACCP Guarantee. Note that the 'T' qualifier is the last character within the product code as highlighted below. The 'T' designation is one of two means to identify product that is tested and found negative for *E. coli* O157:H7; other products without the 'T' code may be accompanied by a Certificate of Analysis in which analysis for *E. coli* O157:H7 was performed.

T - - Tested For ECH7 'ECH7' - *E. coli* O157:H7

The image shows a product label for Tyson Boneless Beef Trimmings. The label is enclosed in a pink border. At the top left, the product code 'D-0101-DMT' is displayed, with the final 'T' highlighted in a tan box. An arrow points from the text 'T - - Tested For ECH7' above to this 'T'. Below the code is a barcode with the number '1894' printed vertically to its left. To the right of the code and barcode, the product name 'BONELESS BEEF TRIMMINGS' is written in large, bold, black capital letters. Below the name, 'IBP SELECTED 50/50' is printed in bold black text. Further down, the website 'WWW.TYSON.COM/IBPFOODSAFETY' is listed in bold black text. At the bottom left of the label, the number '1894' is printed in white on a black rectangular background. To its right, the net weight 'NET WT. 70 LBS. (31.75 kg)' is printed in bold black text.
